PROFILE

Having always enjoyed working with technology, and specifically creativity within this, I have decided to transition my career into the **development sector**. I am now seeking an opportunity to progress my existing skills and knowledge within a **full stack development** role.

WORK EXPERIENCE

SELF-EMPLOYED TAXI AND COACH DRIVER

Uber, Go North East, Denton Travel & National Express

Jun 2006 – current

- Developed **communication** skills by interacting with **diverse** groups of customers
- Developed ability to stay **calm** and have the confidence to work with **minimal supervision**

TRAINEE FULL STACK DEVELOPER

Northcoders

Feb 2022 – May 2022

- Used Node.js and PostgreSQL to develop and manage databases
- Creating projects and developing unit test cases for testing and automation using **Test-Driven Development**
- Software **development techniques** including solo-programming, pair, group programming and sprints
- **Object-Oriented** Programming
- Code **debugging**
- Using **Git** and working with branches and merging in collaboration along with committing code regularly to **GitHub**

Final Project – Maximal Murdle

The Wordle game made in the cooperation with 4 other Boot Camp students. In the game, which also works on mobile devices, we have used **React Native** and the **Firebase**.
